Security Stereo Floor Console
(Part # 318xx) 1976-1995 CJ & Wranglers

WARNING! Before you proceed to the next step, make sure that there is nothing under the vehicle that will be damaged by the drill bit when drilling.

5. Remove the Security Floor Console, cut holes in the carpet where the marks are and drill a 5/16" hole on each marked spot (Figure 5). Use touch up paint or silicone sealant (not included) in any drilled holes to prevent rusting.

NOTE: If you are not installing a stereo proceed to Step 6.

NOTE: If a stereo is to be mounted in the console, an antenna extension wire will be required and is available at most stereo equipment stores.

- **Run all required stereo and speaker wires to the console mounting location. Smittybilt recommends running wires in a protective wire loom and using rubber grommets when passing through any drilled holes.**
 - **Insert stereo into the front of the Security Console. You may need to purchase a mount/install kit from a local electronic shop.**
 - **Connect all wires to the stereo according to your stereo owner's manual.**
 - **A strap is included (if desired) to secure the stereo to the console. Installation is left up to your preference. No hardware for it is included. A common way is to connect to back of stereo then Drill a hole in the console and attach with a nut and bolt. (Fig 6)**
6. Locate (2)-5/16" x 2/12" Hex Head Bolts, (4)-5/16" Flat Washers, and (2)-5/16" Lock Nuts. Fasten down the rear of the console through rear holes in the Security Console and holes in mounting Bracket by using the hardware listed in this step (Figure 5).
 7. Locate (1)-5/16 x 1 3/4" Hex Head Bolt, (2)-5/16" Flat Washers, and (1)-5/16" Lock Nut. Fasten down the front of the Security Console by using the hardware listed in this step (Figure 5).
