

Installation Instructions
Part No. 5008555
Shifter Cable
Fits Pro-Matic 2 & V-Matic 3 Shifters

Rev 02/27/2020

WORK SAFELY! For maximum safety, perform this installation on a clean, level surface and with the engine turned off. Place blocks or wedges in front of and behind both rear wheels to prevent movement in either direction.

CAUTION: To avoid any possibility of bodily injury or damage to vehicle, do not attempt installation until you are confident that the vehicle is safely secured and will not move.

When using Hurst Shifter Cables, you must use proper Hurst Transmission Arms and Bracketry specified for your particular application.

Avoid any sharp bends in the installation of Hurst Cables due to damage of inner cable and eventual failure. Cable could break off completely (possibly internally) and prevent the cable from operating properly.

The warranty will be void if these directions are not followed.

CAUTION: This cable is coiled under tension.

IMPORTANT: RETAIN THESE INSTRUCTIONS FOR FUTURE REFERENCE

Technical Service

Hurst Performance maintains a highly trained technical service department to answer your technical questions, provide additional product information and offer various recommendations.
