

BXW4011 & BXW4012 Hitch Head Kit Installation Instructions

⚠ CAUTION

Before installing the Hitch Head Kit unhook the trailer from the hitch head. Also remove the assembly bars from the hitch head.

1. Remove the existing hitch head from the receiver hitch mount. Do not discard fasteners, they will be reinstalled. If being reused, remove the ball from the existing hitch head and install onto the new hitch head.
2. Install the new hitch head onto the receiver hitch mount in the previously used location, using the existing 3/4" fasteners. Torque the bolts to 260 ft/lbs.
