FDRW-00736	M8 FENDER WASHER	18

PARTS INCLUDED	QTY
Driver Side Running Board	1
Passenger Side Running Board	1
Rocker panel brackets	6
Step Plate	4

Step 1: Identify Driver Side Nerf board.

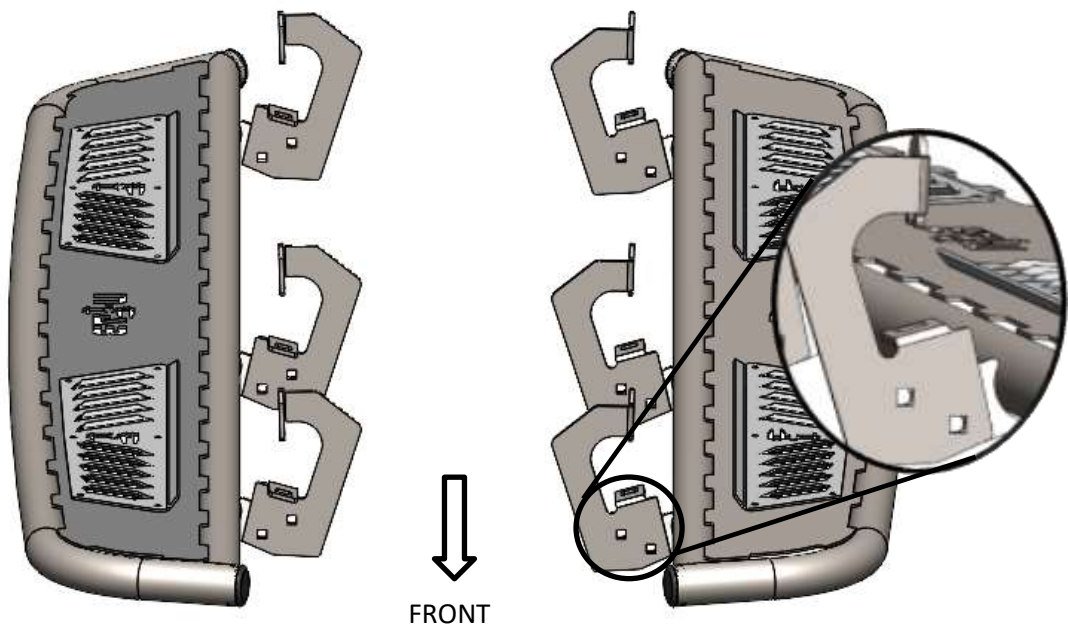

Step 2: Install the supplied step plate (x2) to each Running Board using the M6x20mm button head bolts, M6 nuts and M6 flat washer.

**** DO NOT OVER TIGHTEN ****

Step 3: Install the supplied rocker panel brackets (x6) to the attachments points located on the backside of the main tube (Driver/Passg) using the supplied 3/8" x 1" carriage bolts and 3/8" flanged nuts. Leave finger tight for now.

NOTE: *The brackets will attach to the forward side of the tabs with the threaded part of the carriage bolt facing to the rear of the vehicle.*

PRODUCT: **NERF BOARD**
APPLICATION: **07-18 CHEVY/GM 1500 CC**

Step 4: Look on the underside of the body and locate the factory supplied mounting positions.

NOTE: Some vehicles require the use of speed clips and nuts, which are supplied with the hardware kit.

Step 5: If your vehicle requires the use of the speed clips, install at this time. This requires the removal of a plastic body plug. Using a flat head screwdriver remove the plug and install one of the supplied speed clips.

Step 6: Align the Nerf Board with the mounting holes. Beginning with the middle bracket, use one M8-1.25 bolt and one fender washer for each mounting location and thread the bolts into the mounting holes and leave loose. Continue with the front and rear bracket. **NOTE: Some vehicles require the use of an additional nut and washer for the lower portion of the mounting bracket.**

Step 7: After final positioning, begin at the rear bracket and tighten the lower bolt to 15-20 ft. /lb. Continue to the front bracket and then to the center bracket. Next, tighten the upper mounts from front to back at 15-20 ft. /lb.

Step 8: There will be ½" of adjustment in the (x3) mounting bracket. Adjust to desired position and tighten to (20 ft./lbs).

Step 9: Repeat steps 4-8 for the passenger side.
