

ROOF RACK

Part No. JL012T

Fits: 2018-Current JEEP WRANGLER JK 4-DOOR

REMOVE CONTENTS FROM BOX. VERIFY ALL PARTS ARE PRESENT.

READ INSTRUCTIONS CAREFULLY BEFORE STARTING INSTALLATION.

DO NOT OVER TORQUE. STANDARD OPERATING LOAD FOR TIGHTENING BODY MOUNT NUTS & BOLTS VARIES FROM 18 TO 20 FOOT POUND FOR M8, 35-40 FOOT POUND FOR M10 AND 60 TO 70 FOOT POUND FOR M12.

60-180 min

Cutting Not Required

Drilling Is Optional

POLISHED STAINLESS STEEL – LIMITED LIFETIME
POWDER COATED BLACK – 3 YEARS

PARTS LIST:

Qty	Part Description	Qty	Part Description
1	(A) Driver/Left Front Leg	4	(N) 12mm x 30mm x 5mm Spacer Washers
1	(B) Passenger/Right Front Leg	2	(O) 8mm Nut Plates
1	(C) Driver/Left Rear Leg	8	10-1.50mm x 70mm Allen Bolts
1	(D) Passenger/Right Rear Leg	2	10-1.50mm x 30mm Hex Bolts
2	(E) Left or Right Side Rails	2	10mm x 27mm x 3mm Flat Washer
2	(F) Front or Rear Cross Rails	16	10mm x 20mm x 2mm Flat washers
1	(G) Driver/left Rear Mounting Bracket	2	10mm Lock Washer
1	(H) Passenger/right Mounting Bracket	8	10mm Nylon Lock Nuts
4	(I) Basket/accessory Crossbars	6	8-1.25mm x 35mm Countersunk Lock Bolts
8	(J) 8-1.25mm x 70mm Hex Bolt W-Knobs	4	8-1.25 x 25mm Hex Bolts
4	(K) "L" Light Brackets	8	8mm x 24mm x 2mm Large Flat Washers
1	(L) Tailgate Top Seal	16	8mm x 16mm x 1.6mm STD Flat Washers
2	(M) 650mm x 25mm x 8mm Adhesive Backed Foam Top Seals	4	8mm Lock Washers
1pr	1200mm x 10mm x .8mm 2-Sided Tape	4	8mm Hex Nuts
2	(P) 80mm x 45mm x 2mm Front Foam Pads	8	8mm Nylon Lock Nuts
2	(Q) 36mm x 16mm x 2mm Front Foam Pads	20	Plastic Wire Ties
2	(S) Left Rear Mounting Bracket Foam Seals	1	6mm Wrench
2	(R) Right Rear Mounting Bracket Foam Seals	1	5mm Wrench
6	12mm Rubber Plugs	1	150mm Foam Tube (antenna)
5	12mm Wiring Grommets	1	Tube of Cleaner/Adhesive Activator
8	10mm Rubber Plugs (cross rails)	1	Bottle-Thread Locking Compound

PROCEDURE:

REMOVE CONTENTS FROM BOX. VERIFY ALL PARTS ARE PRESENT. READ INSTRUCTIONS CAREFULLY. ASSISTANCE IS REQUIRED.

1. Start installation by removing the roof panels and hard top assembly. **NOTE:** Follow the instructions provided in the owner's manual to remove the roof panels and top.
2. Remove both wiper arm assemblies, **(Figure 1)**. Next, carefully pry up sides of the plastic center trim panel to remove panel from top of cowl panel in front of windshield, **(Figures 1 & 2)**.
3. Open hood fully and rest hood on top of windshield. **IMPORTANT:** Place pad between hood and windshield to protect finish. Locate and remove the plastic clips under the rear rubber seal attaching the front of the cowl to the body, **(Figure 3)**. Lower hood and place hood on support prop.
4. Remove the bolts at both ends of the cowl, **(Figure 4)**. Carefully pry up the back of the plastic cowl panel to release the clips in the panel from the body. **NOTE:** The cowl does not have to be removed, only fully released to access windshield hinge hardware.
5. Remove the lower/outer bolts attaching the passenger/right side body corner panel and remove panel, **(Figure 5)**. Repeat to remove driver/left corner panel.
6. Remove the passenger/right outer hinge bolt, **(Figure 5)**.
7. Select the passenger/right Roof Rack Leg, (1) Large and (1) Small Rectangular Foam Pads. Apply the Pads to the bottom of the Rack Leg Base, **(Figure 6)**.
8. With assistance, hold the Rack Leg up in place over the body. Line up the inner mounting hole in the Base with the windshield hinge. Reuse the factory hex bolt to attach the Base to the hinge, **(Figure 7)**. Reuse the factory bolts to attach the outer mounting holes in the Base to the threaded holes in the side of the body, **(Figure 8)**. Do not fully tighten hardware at this time.
9. Next, select the driver/left Rack Leg. Repeat **Steps 6—8** to install the Rack Leg.
10. Select (1) Cross Rail. Loosen Rack Legs enough to insert the Cross Rail between the top of the Rack Legs. Attach the Cross Rail to the Rack Legs with the included (2) 10mm x 70mm Button Head Bolts, (4) 10mm x 20mm Small Flat Washers and (2) 10mm Nylon Lock Nuts, **(Figures 9 & 10)**. Do not tighten hardware at this time. **NOTE:** It may be necessary or easier to temporarily remove one Rack Leg to insert the Cross Rail. Cross Rail can be installed with light tabs facing forward or to the rear.

11. Move to the passenger/right rear of the vehicle. Select the passenger/right Rear Mounting Bracket, (1) "Left" and (1) "Right" Adhesive Backed Foam Gaskets, **(Figure 11)**. Apply the Gaskets to the top and bottom of the Mounting Base.
12. Line up the (2) countersunk mounting holes in the Bracket with the factory threaded holes in the body, **(Figure 12)**. Apply included Thread Lock Compound to (3) 8mm Countersunk Bolts, **(Figure 13A)**. Attach the Bracket to the top of the body with (2) 8mm x 35mm Countersunk Bolts, **(Figure 13B)**. Next, select (1) 8mm Nut Plate. Push the plastic cover down slightly and insert the Nut Plate under the edge of the body. Attach the Bracket to the Nut Plate with (1) 8mm x 35mm Countersunk Bolt, **(Figure 13 & 14)**. Fully tighten the mounting hardware at this time.
13. Select (1) 25.5" x 1" (650mm x 25mm) Long Foam Seal, **(Figure 15)**. Remove the factory seal from the top of the body. Clean surface with isopropyl alcohol, (not included). Apply Foam Seal tight against Mounting Base and along body in same location as factory seal, **(Figure 16)**. Trim as required.
14. Repeat **Steps 11—13** to install the driver/left Mounting Bracket and Side Seal.
15. Reinstall hardtop and top panels if desired. **IMPORTANT:** before reinstalling top, place the included (4) 12mm x 30mm x 5mm Spacer Washers over the threaded holes in both sides of the body, **(Figure 15)**. Insert the factory bolts for top down through the top, the Spacer and into the body to support the top, **(Figures 15 & 17)**.
16. Select (1) Side Rail. Attach the Side Rail to the back of the Front Leg (1) 10mm x 70mm Button Head Bolt, (2) 10mm x 20mm Small Flat Washers and (1) 10mm Nylon Lock Nut, **(Figure 18)**. Make sure Side Rail is oriented properly. **IMPORTANT:** Do not let Side Rail damage the top. Do not fully tighten.
17. Next, select the passenger/right Rear Rack Leg, **(Figure 19)**. Repeat **Step 16** to attach the Rear Leg to the Side Rail. Attach the Rear Leg to the Mounting Bracket with (1) 10mm x 30mm Hex Bolt, (1) 10mm Lock Washer and (1) 10mm x 27mm Large Flat Washer, **(Figure 20)**. Leave hardware loose.
18. Select the remaining Cross Rail. Repeat **Step 10** to attach the Cross Rail to the rear Rack Legs with (2) 10mm x 70mm Button Head Bolts, (4) 10mm x 20mm Small Flat Washers and (2) 10mm Nylon Lock Nuts, **(Figures 21 & 22)**. Do not fully tighten.
19. Move to the rear of the vehicle and open the tailgate. Clean the top edge (inside and outside) of the tailgate, **(Figure 23** - isopropyl alcohol recommended - not included). Select the small tube of adhesive Primer. Wipe the inside and outside of the tailgate with the Primer. Apply (1) strip of the Double Sided Tape to the outside of the tailgate close to but not over the top edge of the tailgate, **(Figure 24)**. Cut to fit width of tailgate. **IMPORTANT: DO NOT REMOVE the outer backing tape** from the Double Sided Tape at this time. Repeat to apply remaining Double Sided Tape to the inside of the tailgate.
20. Select the Rubber Edge Seal. Clean the channel in the Seal, **(Figure 25)**. Wipe the entire channel with Primer. Slide the Seal over the edge of the tailgate and the Double Sided Tape. Push the Seal down fully onto the tailgate. With the tailgate fully open, pull back the inner lip on the Seal with one hand, grab the end of (1) backing tape with the other hand and **slowly pull the backing tape off** to stick the Seal to the Tape, **(Figure 26A & 26B)**. Continue the full length of the Seal. Close the tailgate and repeat to attach the Seal to the Double Sided Tape on the outside of the tailgate, **(Figure 26A)**.
21. On models with antenna, slide the included Antenna Sleeve Tubing onto the antenna.
22. If bar style LED light will be installed, (not included), use brackets and hardware included with light or select (2) of the included "L" Light Bar Brackets, **(Figure 27)**. Attach the Brackets to the top of the Roof Rack with the included (2) 8mm x 25mm Hex Bolts, (4) 8mm Flat Washers, (2) 8mm Lock Washers and (2) 8mm Hex Nuts.
23. Next, select (1) Cargo Cross Bar, **(Figure 28)**. Attach the Crossbar to the top of the Side Rails with (2) 8mm x 70mm Bolts with integrated Knobs, (2) 8mm x 16mm Small Flat Washers and (2) 8mm Nylon Lock Nuts, **(Figure 28)**. Repeat this Step to install the remaining (3) Cross Bars in desired locations. **NOTE:** (4) Cross Bars are included with the Roof Rack and can be installed in any of the (6) mounting locations depending on size and shape of roof basket (not included) or accessories, **(Figure 29)**.
24. Check the Roof Rack for alignment, adjust as necessary and fully tighten all hardware. Start tightening sequence at the base of the front Mounting Legs, then move to rear Mounting Bases, Rear and Front Cross Rails, both Side Rails and all Crossbars.
25. Reinstall front cowl, plastic trim panel and wiper arm assemblies.
26. Do periodic inspections to the installation to make sure that all hardware is secure and tight.

To protect your investment, Do not use any type of polish or wax that may contain abrasives that could damage the finish. Mild soap may be used to clean the Roof Rack.

(Fig 24) Apply (1) strip of Double Sided Tape to outside of tailgate, DO NOT REMOVE OUTER BACKING TAPE! Repeat to apply (1) strip of Tape to inside of tailgate

(Fig 25) Clean inside channel (arrow) on Tailgate Seal with Activator

(Fig 26A) Slide Seal over top of tailgate and Tape. Start at end, pull back outer lip on Seal to expose Tape. Slowly remove/pull off outer backing from Tape and stick Seal to Tape and tailgate. Repeat to remove backing from inner Tape on tailgate

(Fig 26B) Pull back outer lip on Seal to expose Tape on tailgate (Fig 24)

8mm x 25mm Hex Bolts
(2) 8mm x 24mm STD Flat Washers
8mm Lock Washer
8mm Hex Nut

(Fig 27) Attach "L" Light Brackets to slots

8mm x 70mm Bolt w/Knob
8mm x 16mm Small Flat Washer
8mm Nylon Lock Nut

(2) 10mm Plugs

(Fig 28) Attach Cross Rails to top of Sidebars. Use 10mm Rubber Plugs to fill unused mounting holes in Side Rails

(Fig 29) Attach (4) Cross Rails to any of the (6) mounting locations as desired. Use 10mm Rubber Plugs to fill unused mounting holes in Side Rails

PRODUCT CARE

- Periodically check the product to ensure all fasteners are tight and components are intact.
- Regular waxing is recommended to protect the finish of the product.
- **Use ONLY Non-Abrasive automotive wax.** Use of any soap, polish or wax that contains an abrasive is detrimental and can scratch the finish leading to corrosion.
- Aluminum polish may be used to polish small scratches and scuffs for **Stainless Steel finish.**
- Mild soap may be used to clean the product for both **Stainless Steel and Black finish.**

FAQ's**1. Hardware's are not of correct size.**

In GMC / Chevrolet truck model 2006 & up, customer needs to reuse the factory body bolts to install the bracket. If your vehicle is not GMC / Chevrolet 2006 & up, ensure that holes are not partially covered with any plastic grommet or rust? If it is, remove the plastic grommet & rust from the thread holes & re-try the installation.

2. Mounting Bracket are not getting Installed properly.

In some cases Illustration images shown in Installation manual may not be the exactly same as per actual vehicle images ,also if Driver / Passenger side mounting brackets are very identical in the design, suggest referring Parts Identification guide to avoid fitment issue.

3. Products are thumping / rattling after installation.

Ensure that all required mounting brackets / hardware's are installed & tighten correctly. Suggest using white lithium / regular grease between the metal to metal contact surfaces.

4. Side Bar is not aligning with vehicle / Step Pads are not aligning with vehicle doors.

Side bar may be interchanged or mounting brackets are not installed at the correct position in the vehicle. Refer Parts identification guide.

5. Missing / Excess Hardware.

Recheck hardware count as per the part list.

6. Product not installing properly.

Ensure make model year, cab length and bed size of your vehicle is listed in the application. All installation steps are followed correctly.
