Important Safety Information

- Before driving, ensure that the window vents are properly secured to vehicle.
- Do not use automatic "brush style" car washes as window vents may accidentally be pulled off the vehicle.
- Do not use cleaning solvents of any kind on the acrylic surface of the window vents to avoid accidental damage.
- Periodically check the window vents to ensure they remain securely fastened to the vehicle.

Adhesive Promoter

Preparation Before Installation

- A trial fit is recommended to ensure proper positioning and fit.
- Check fit of parts before painting as we will not accept the return of modified or painted parts.
- Wash your vehicle to remove any dirt or grime from the area where the hood protector will be attached and dry thoroughly with a clean towel.

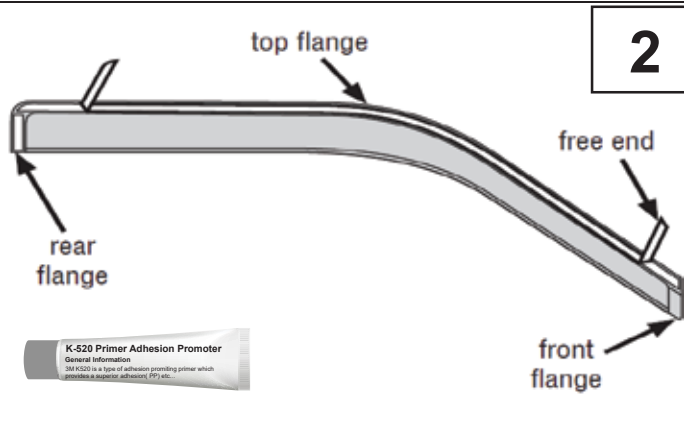

INSTALLATION STEPS

NOTE: Actual application may vary slightly from illustrations.

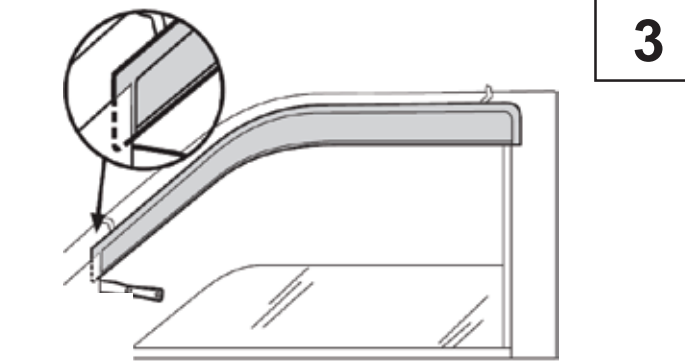

1

Lower the window. Clean the door's painted surface where the visor will attach.

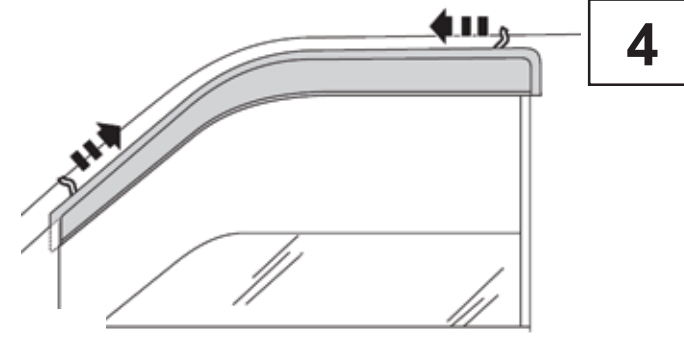

2

Remove the tape liner from the rear flange. Peel back 2" of tape liner from each end of top flange. Lightly apply adhesion promoter to the tape area which has been exposed from removing the tape liner and let dry (approximately 1 minute)

3

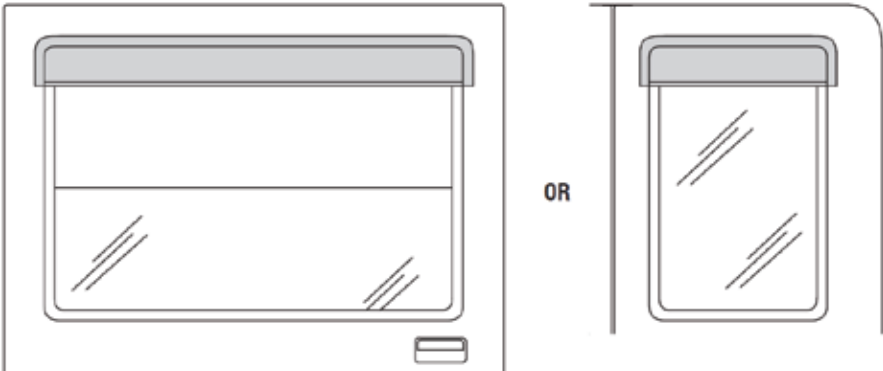

Slide the front flange behind the mirror cap, use a putty knife to create a gap if needed. Attach the top and rear flanges to the door's painted surface.

4

Remove tape liner by pulling on free ends. Apply pressure to top and rear tape flanges to secure. Raise the window.

4 Piece Set

OR

The rear visor attaches with same preparation methods as the front visor. Attach visor to the vehicle's painted surface.

Información importante de seguridad

- **PRECAUCIÓN** - Antes de conducir, asegúrese de que la visera deflectora esté correctamente anclada al vehículo.
- No utilice servicios automáticos de limpieza de vehículos que utilizan cepillos.
- No utilice limpiadores al solvente de ningún tipo.
- Compruebe periódicamente que todos los componentes estén ajustados.

Contenido - Juego de dos piezas

Preparación antes de instalar o pintar

- Se recomienda realizar un ajuste de prueba para asegurar el posicionamiento y ajuste correctos.
- Compruebe que las piezas se ajusten correctamente antes de pintarlas, ya que no aceptaremos la devolución de piezas modificadas o pintadas.
- Lave los canales de la ventanilla del vehículo para quitar los desechos y la suciedad.
- Seque los canales de la ventanilla con una toalla limpia.

Pasos de instalación

Nota: El uso real puede variar levemente de ilustraciones.

Baje la ventanilla. Limpie la superficie pintada de la puerta en donde se colocará la visera.

Quite la cinta protectora del reborde trasero. Retire 2 pulgs. de cinta protectora de cada uno de los extremos del reborde superior. Aplique ligeramente el promotor de adhesión en el área de la cinta que ha quedado expuesta al retirar el revestimiento de la cinta y deje secar (aproximadamente 1 minuto).

Deslice el reborde frontal por detrás de la cubierta del espejo. Si es necesario, utilice una espátula para crear el espacio. Coloque los rebordes superiores y traseros a la superficie pintada de la puerta.

Retire la cinta protectora tirando de los extremos libres. Aplique presión sobre los rebordes de cinta superior y trasero para ajustar. Suba la ventanilla.

Juego de cuatro piezas

La visera trasera se coloca siguiendo los mismos pasos que para la visera frontal. Coloque la visera sobre la superficie pintada del vehículo.

Préparation pour l'installation / la peinture

- *Il est recommandé de procéder à un essai pour s'assurer que le positionnement et l'ajustement sont corrects.*
- *Vérifier l'ajustement des pièces avant peinture, car nous n'acceptons pas le retour de pièces modifiées ou peintes.*
- *Laver les glissières de glaces de la portière du véhicule pour éliminer toute poussière et tous débris.*
- *Sécher les glissières avec une serviette propre.*

Étapes d'installation

NOTE: L'application réelle peut changer légèrement des illustrations.

Abaisser la glace. Nettoyer la surface peint de la portière où la visière doit être installée.

Retirer la protection d'adhésif de la patte arrière. Découper environ 5 cm (2 po) de protection d'adhésif à chaque extrémité du rebord supérieur. Appliquez légèrement le promoteur d'adhérence sur la zone du ruban qui a été exposée en retirant la doublure du ruban et laissez sécher (environ 1 minute).

Glisser le rebord avant derrière le couvercle de rétroviseur. Au besoin, utiliser une couteau à mastiquer pour permettre le passage du rebord. Fixer les rebords avant et arrière sur la surface peinte de la portière.

Retirer la protection d'adhésif en tirant sur les extrémités libres. Appuyer sur le haut et l'arrière pour faire adhérer le ruban. Relever la vitre.

Ensemble 4 pièces

L'installation de la visière arrière demande la même préparation que la visière avant. Installer la visière sur la surface peinte du véhicule.

PRODUCT CARE

Periodically check the product to ensure all fasteners are tight and components are intact.
