4. Trim panel is attached to door by two clips. See figure 1. Use a trim panel tool or flat edge screw driver to pop trim panel clips out from the slots in the door. See figure 4.

5. Remove all the 6 T20 torque head screws which are located on the outside perimeter of the door using a T20 torque head bit. See figure 5.

6. After removing the screws pull the door panel towards you by lifting the door by hand. See below images.

Page **3** of **6** Rev 112118

7. Pop out the switch panel either by hand or a bezel removal tool. Then unplug the harness from switch panel. Once done door panel completely comes off. See below images.

8. Remove the nuts using 10mm socket, ratchet and extensions. See figure 6.

Socket and Ratchet Set

NOTE: Ensure one person holds the mirror from the outside when loosening the nuts to prevent the mirror from falling.

9. Unplug the OEM mirror electrical wire from the socket. See figure 7.

- 10. After all nuts are removed and wire connection is unplugged, slowly remove the OEM mirror from the vehicle.
- 11. Slide the mirror studs of the new TrailFX tow mirror into the three holes in door.
- 12. Re-install the washers and nuts using a 10mm socket and ratchet. Once mirror is secure, plug in wiring connection.

Page **4** of **6** Rev 112118

13. Insert the New TrailFX mirror wiring harness in to socket. See figure 8.

- 14. Re-install the plastic trim panel by inserting the plastic clips of the cover into the slot and push into place.
- 15. After installation, check all mirror functions to make sure they are working properly.

PRODUCT CARE

- 1. Periodically check the product to ensure all fasteners are tightened and components are intact.
- 2. Regular waxing is recommended to protect the finish of the product.
- 3. **Use ONLY Non-Abrasive automotive wax.** Use of any soap, polish or wax that contains an abrasive is detrimental and can scratch the finish leading to corrosion, ensure the cloth used for wiping is clean and soft.

FAQ's

1. Tow mirrors are loose after installation.

Please ensure that all required mounting brackets / hardware's are installed & tightened correctly.

2. Missing / Excess Hardware.

Re-check hardware count as per the part list.
